E-Mail: sbhattacharya@floridapoly.edu

Education

Ph.D. in Computer Science and Software Engineering Auburn University, USA Advisor: Dr. Debswapna Bhattacharya G.P.A: 3.79	Fall 2021
M.Tech in Distributed and Mobile Computing Jadavpur University, India Advisor: Dr. Pampa Sadhukhan C.G.P.A: 8.11	June 2014
B.Tech in Information Technology Bengal Institute of Technology, India C.G.P.A: 7.67	June 2011

Employment

Assistant Professor, Department of Computer Science, Florida Polytechnic University, USA,
September 2021 – Ongoing.

Assistant Professor, Department of Computer Science and Engineering, Chaibasa Engineering
College, India, July 2014 – Aug 2017.

Teaching Experience

As an Assistant Professor at Florida Polytechnic University (September 2021 – Ongoing)

1. **Senior Design I (COP4934C)**: The objective of this course is to cultivate the capability of designing and modeling computer applications based on the finding of facts within an application domain. I am teaching three sections, each containing around 20 students.

As a Teaching Assistant at Auburn University (Fall 2017 – Summer 2020)

1. **Fundamental of Computing I (COMP 1210)**: It introduces the fundamentals of computing as well as certain aspects of software engineering, which enables students to construct logical, readable, and correct programs. I was a lab instructor of this course from Fall, 2017 to Spring, 2019. My supervisor was Dr. James Cross.

2. **Computational Intelligence & Adversarial Machine Learning (COMP 5970/6970)**: It is a graduate-level course, which introduces concepts of Evolutionary Computation, Machine learning

techniques such as SVM, NN, Naïve Bayesian Classifiers, Adv Machine learning. I was a TA of this course in Fall, 2019 and my supervisor was Dr. Gerry Dozier.

ONLINE

3. Introduction to Computer Science I & II (CPSC 1213 and 1223): These courses are the online version of COMP 1210. I was a (virtual) lab instructor of this course from Fall, 2018 to Spring, 2020. My supervisor was Dr. James Cross.

4. Data Structures (CPSC 1233): It is designed to introduce fundamental data structures and associated algorithms, as well as applications in which they are commonly used. I was a (virtual) lab instructor of this course in the Summer, 2020 and my supervisor was Dr. Dean Hendrix.

As an Assistant Professor at Chaibasa Engineering College (July 2014 – August 2017)

1. Discrete Mathematics (MH1401): This course was designed for fourth-semester undergraduate Computer Science and Engineering (C.S.E.) students, which covered Logic, Set, Relation, Function, Induction and Recursion, Counting, Graphs, and Trees. I supervised this course, where the number of enrolled students was 46 (2013-17 batch) and 49 (2014-18 batch).

2. Operating System (CS1504): This course covered Thread, Process Management, Memory Management, and Disk Management. I supervised this course, where the number of enrolled students was 48 (2014-18 batch). This course is designed for fifth-semester undergraduate C.S.E. students.

3. Digital logic (CS1302): This course covered the Combinational Logic circuit as well as the Sequential Logic Circuit with applications. Around 50 third-semester undergraduate students of the C.S.E. department of 2013-17 and 2014-18 batches, respectively, took this course.

4. Data Structure using C (CS1402): Fourth-semester undergraduate C.S.E. students of 2013-17 and 2014-18 batches as well as fifth-semester undergraduate Electrical Engineering (E.E.) students of 2013-17 batch took this course, where Array, Linked List, Stack, Queue, Sorting and Searching, Tree, and Graph were covered in C.

5. Analysis and Design of Algorithm (CS1606): Sixth-semester undergraduate C.S.E. students of 2013-17 batch took this course, where Elementary Data Structures, Sorting, Hashing, Trees, Graphs, Dynamic Programming, and Greedy Algorithms were covered.

6. Formal Language and Automata Theory (CS1501): Fifth-semester undergraduate C.S.E. students of 2013-17 batch took this course where Finite automata, Context-free Grammars, Decidability, and Intractability were covered. The number of enrolled students was 46.

7. Programming in Python: Almost 50 students took this course as their summer training in 2017, and it covered Control flow, Function and Module, Files, Input/Output, List, and Dictionary.

8. Programming in C: I tutored around 20 struggling students in 2015 and 2016. It covered Control flow, Function, Arrays, Pointers, Structures, and Files. Since C was the first programming language that they were learning, I guided students one-to-one to enable them to do well in learning C.

9. Introduction to Computing (CS1201): This was an introductory course offered to freshman undergraduate students. The number of enrolled students was 92, 94, and 87 in 2014, 2015, and 2016, respectively.

Research Experience

Ph.D. dissertation research

Fall 2017 – Fall 2021

Advisor: Dr. Debswapna Bhattacharya, Assistant Professor

Title: New computational and data-driven methods for protein homology modeling (Publication in Nature Scientific Reports, PROTEINS, PLOS, Bioinformatics, Frontiers)

Institute: Auburn University

Technical Skills

Data Science Tools: Python3, TensorFlow 2.0, Keras, scikit-learn, R

Data Visualization Tools: Matplotlib, Seaborn

Molecular Visualization Tools: PyMOL, Chimera

Languages known: Python, C, C++, Java, Perl, R

Honors and Awards

(8) Work has been selected for **Highlight Talk** in the 12th ACM-BCB conference (Virtual), Aug 1-4, 2021.

(7) **Fellowship award** for ISMB/ECCB 2021 conference (Virtual), July 25 – 30, 2021.

(6) **Best Poster** award in the 11th ACM-BCB conference (Virtual), Sept 21-24, 2020.

(5) Work has been selected for **Highlight Talk** in the 10th ACM-BCB conference, Niagara Falls, NY, Sept 7-10, 2019.

(4) Paper got published as the **Front Cover Article** in the July 2019 issue of Proteins: Structure, Function, and Bioinformatics journal.

(3) Awarded **Young Research Excellence Award** (2nd place) at 16th Annual MCBIOS Conference, Birmingham, USA, 2019.

(2) Awarded Travel grant to attend 16th Annual MCBIOS Conference, Birmingham, USA, 2019.

(1) A.I.C.T.E. **National Scholarship** for M.Tech at Jadavpur University, Kolkata, India [2012 – 2014].

Peer-reviewed Publications

Book Chapter

(1) **S. Bhattacharya**, R. Roche, M. H. Shuvo, D. Bhattacharya, “Contact-assisted threading in low-homology protein modeling”, Methods in Molecular Biology, by **Springer Nature**, 2021 (Accepted). (*Impact Factor: 10.71*)

Journals
